In the deepest state of sleep your brainwave patterns change to slow frequency delta waves. Dr. Jeffrey Thompson has developed unique ways to embed these delta pulses into carefully crafted musical soundtracks. After a few minutes of listening your own brainwaves naturally lock onto the delta pulses and lead you easily into deep, restful sleep. Dr. Jeffrey Thompson's clinical research with thousands of patients has led to groundbreaking discoveries in how sound frequency patterns built into musical soundtracks can alter states of consciousness and induce mind-body healing. His audio programs are used by Fortune 500 companies, health care professionals, and individuals worldwide.
