

The Voices of Fishermen - on Superstitions

There is something in all of the worlds people that dislikes randomness. We want explanations for the seemingly unexplainable. Most of all, we want to find ways to control what happens to us and those we love. Superstitions are one way by which we seek that goal. This full color book highlights incredible photography along with some of the superstitions handed down through generations of commercial fishing families. The Voices of these Fishermen form part of the living history of fishermen and their families everywhere. The Voices of Fishermen is the third volume in this inspirational series from former Rear Admiral/Assistant Surgeon General, psychologist, and award-winning photographer, Dr. Brian Flynn. As in his previous books, *The Wisdom of Stones*, and *The Voices of Stones*, Dr. Flynn again is able to communicate the powerful lessons learned in his many years as a trauma psychologist.

The Voices of Fishermen: On Superstitions: : Brian Some fishermen believe that when any person is drowned, a voice is heard from the water, and it predicts a squall.
